

NOMENCLATURE 2008 TECHNICAL REGULATIONS

Parts for the FORMULA RENAULT 2.0 single-seaters are represented in this nomenclature and split into three categories:

CATEGORY "A"	No modifications are authorised. The parts in this category must remain in their original positions and fulfil the function/s for which they were originally intended. These parts must be genuine FORMULA RENAULT 2.0 parts.
CATEGORY "B"	Only the modifications or prescriptions indicated in the regulations or in the FORMULA RENAULT 2.0 nomenclature are authorised.
CATEGORY "C"	The parts classed in this category are considered to be unrestricted, on the express condition that the function for which it was originally designed is not deviated from, that it does not fulfil any additional function and that it is located in the same place as the original part. Adapted parts are permitted but must be submitted for approval to the RENAULT SPORT Scrutineers.

The set of items or subassemblies that make up a part or assembly are deemed to belong to the same category as the part or assembly in question.

Scrutineering may consist of comparing the part to be checked against a similar new genuine FORMULA RENAULT 2.0 part.

All parts not shown in the technical regulations are systematically classed in category "A" unless specified otherwise above.

The pictures published in this document only aim at making the nomenclature easier to understand. These pictures cannot be used for any comparison with original vehicle parts.

Some parts from the A and B category present a special mark (hologram, engraving). The presence of this mark guarantees the origin of the part and their use is mandatory. The absence of a mark is a technical non conformity.

NOMENCLATURE

2008 TECHNICAL REGULATIONS

Nuts, screws, bolts, and uniballs

Nuts, screws, bolts and uniballs are in the category C unless mentioned in the nomenclature. However, the following must be respected:

- the original diameters,
 - the original screw thread,
 - the material should be steel of equal or superior quality as that of the original part.
- The use of other materials (e.g., titanium) is forbidden.

Any type of screw (stud, bolt or standard screws) is allowed, unless mentioned in the nomenclature.

To assure the tightness of the screws, the use of locking wire is permitted,

All the screws that have the function of setting-up an element are in category "A" unless other mention in the nomenclature.

Electrical loom

All the electrical looms belong to category "B" and must be genuine. The loom may be protected by non-retractable sheathes.

Protections

It is allowed to add protection of any kind over the mechanical elements of the car unless specifically mentioned in the nomenclature. These protections must have the sole function of protecting the elements.

For the driver wellness, it is allowed to add protections in the cockpit, these protections must be removed fast without tool.

Bodywork

Only in order to manage correct assembly and adjustment of the bodywork part, it is allowed to slightly modify the bodywork parts and their respective supports.

These modifications are submitted to the approved by RENAULT SPORT technical scrutineers.

NOMENCLATURE 2008 TECHNICAL REGULATIONS

BODYWORK, WINGS, ROLL HOOP, ENGINE EQUIPMENT

Component parts of the bodywork, wings, roll hoop and some engine equipment parts are identified by one or more hologram stickers.

Their presence is mandatory. The person competing is responsible for the condition of the stickers. They must be visible.

All the bodywork parts and the tub can be painted or decorated with adhesive film.

Description of the parts with the location and number of hologram stickers are indicated by arrows.

		
Nose : 1 sticker	Nose : 1 sticker	Front cover : 1 sticker

		
Front wing : 2 stickers	Front wing side plate : 1 sticker	Front wing flap : 1 sticker

			
Tub : 1 sticker	Roll hoop : 1 sticker	Air intake : 1 sticker	Air box : 1 sticker

NOMENCLATURE 2008 TECHNICAL REGULATIONS

	
Front floor : 4 stickers	Rear floor : 4 stickers

		
Deviator : 1 sticker	Rear floor cup : 1 sticker	Front wood : 1 sticker

		
Medium wood : 1 sticker Rear wood : 1 sticker	Side pod : 1 sticker	Tyre ramp : 1 sticker

		
Radiator duct : 1 sticker	Chimney : 1 sticker	Barge board : 1 sticker

		
Rear wing : 1 sticker	Rear wing side plate : 1 sticker	Engine cover : 1 sticker

NOMENCLATURE 2008 TECHNICAL REGULATIONS

ENGINE

	A	B	C	
1		X		77 11 154 966

1B : Engine

The engine bears four seals and one tag :

- on the engine sump
- on the ignition target
- on the oil pump
- on the camshaft blanking caps

A microchip is in place on the cylinder head, flywheel side.

Seals must remain in place. It is forbidden to carry out any work on the engine.

WARNING : competitors are responsible for the condition of seals.

The engine lubricant used must absolutely respect the following criterion:

Grade : 50

No additive is allowed.

Every engine must be tested on the dyno in order to control its performance and the installation of the 2008 seals as well as the microchip. The motorist named by Renault Sport will be responsible for the dyno test.

If this article is not respected, it will be considered as a technical non conformity.

8B : Engine air intake

It is authorized to apply a sealant compound on the lower mating plane of the air box.

9B : Tightness air box

The installation of the tightness airbox plate is mandatory and must be done following the instructions of the User Manual 2008.

14B : Big duct manifold

Only the big duct manifold ref: 77 11 155 542 is authorized.

16B : Throttle cable

It is authorized:

- to fit resistant wrap-sheathing to the throttle cable in the area above the engine.
- to cut the end of the cable protection on the pedal side.

25			X	77 11 154 735

5B 17B 19B 20B 22B : Water pipes

It is allowed :

- to adjust the length and the shape of the water pipes in order to fit the radiator correctly.
- to fit a wrap/sheathing protection on the pipes

7B : Coolant expansion tank

It is authorized :

- to use rubber mountings for the coolant expansion tank.
- to polish it,
- to anodize it.

16B : Recuperation tank

The tank's minimum capacity must be two liters. This container must be in transparent plastic or must have a transparent panel.

21B : Water radiator

It is permitted to install a protective grid behind and ahead of water radiator in the sidepods. It must be located between the carbon air duct fastening screws and the radiators. A heat shield can be added to this grid to control the water temperature.

It is permitted to improve the air tightness between the radiator and its air ducts.

3B : Upper wishbone support

It is authorized to interpose between the supports of the uppers front wishbones and the bodywork one or more setting shims to balance the castor angle between the right side and the left side.

The total thickness is 1.5 mm maximum behind each support.

This authorization intervenes with an aim of equalization of the castor angle and not of an adjustment.

9B : Lower wishbone mounting

It is authorized to do a mark (with a drill bit).

15B 16B : anti-intrusion screw

The maintaining of the 2 anti-intrusion arms of the upper front wishbones by this screw / bolt assembly is not compulsory.

2B : Wheel nuts

Two types of nut are allowed:

Ref : **77 11 154 881** Ref : **77 11 154 936**

3B : Wheel

It is allowed to paint the wheels without any dimensional modification

4B : Brake disc

The minimum thickness is 17 mm.

6B : Hub

It is allowed to surface the interior face of the hub provided that respect the 32,9 mm ± 0.05 quotation in relation to the shoulder of the bearing (see 2008 Technical bulletin n° 2)

8B : Hub carrier bearing

The characteristics of grease are free.

12B : Rear camber adjusting shims

Two types of shims are authorized:

- thickness: 1 mm ref : 77 11 154 547 and 2 mm ref : 77 11 154 548

15B : Brake calliper

The springs of the pistons are free and can be remove.

ref. **77 11 154 134** and **77 11 154 281**

It is allowed to fit concave or convex mirrors.

13B : Ballast

The location of the ballast and its fastening system are specified in the User Manual 2008 (page 40-4).

The material of the ballast is free.

If the car has a ballast to bring it up to the regulation weight, it must be sealed by the scrutineers in charge of the FR2.0 when the preliminary technical inspections are carried out.

The condition of the seals and their presence are the responsibility of the person competing.
